

2020-08-26 Meeting Notes

Notes:

- Training in cybersecurity, infrastructure, internal IT shop leads to flaws.
- Tool Titanum aka botnet security tool
- Training people on that security tool
- Students that apply for the event we can deploy on-demand,
- Some clients use IBM Cloud
- Open to any hosting environment.
- Web-based panel
- Uses CTF T
- Internal employees, and tools for customers
- CTX - 1 guy who manages that lab or solution
- Hook into maybe the alternative that
- Alert when resources are not being used.
- GCP is not supported by Pwc,
- They use Gitlab internally,
- Modularity is one of the most important.
- “Docker makes the most sense”, configuration variable in the template
- CTF platform is the most used, or training platform along with lab environment.
- Lay back meetings
