

2020-09-23 Meeting Notes

Meeting Hits

Topics	Outcomes
Milestones (Gavin and Jet)	Add to roadmap Get draft of design doc by next meeting
Architecture (Zane)	
Ansible + Chef (Adis and Rishabh) Progress made on Ansible -Adis <ul style="list-style-type: none">Got an aws ec2 up from ansible (Demo?)<ul style="list-style-type: none">Can make our own Amazon machine imageLooking into ECS for potential docker usageWith ansible, we can launch our own Amazon Machine images, so this could be a good way forward	Focus more on implementing this into design
General Questions <ul style="list-style-type: none">Can we get an example lab for testing purposes?Do we have access to any non-free cloud?What type of configurations should be implementedInteresting AWS pen testing requirements	For config, use what ever standard there is. Likely no platform given to us
Detailed project plan <i>Templates</i>	Have our milestones and and get this done as soon as possible. Send it to matt when we are done

General Notes

Things to get done:

Get the design document up

Get a basic roadmap

Setup resources for cloud to use
